## NSAV

April 2020

### General information:

Mono-adhesive PVC tape of 100 micron thickness, coated with a solvent free, age-resistant and permanent elastic acrylate adhesive "dot-shaped" that guarantees an easy, fast, bubble-free and repositionable application. Product used for the creation of personalized adhesive signs for interior and exterior spaces.

### Characteristics and Applications:

- **NSAV** is especially indicated for vertical surfaces
- Excellent adhesion on multiple surfaces such as glass, wood, aluminum, steel, plastic, etc.
- Bubble-free
- Easy and quick to use
- Repositionable
- Does not damage surfaces
- Acid free
- Solvent free
- Excellent resistance to aging and UV rays
- For interior and exterior spaces
- Ideal for vertical applications on doors, panels, windows, glazings, partitions, etc.

### TECHNICAL DATA

<b>Thickness:</b>	0.10 mm
<b>Product:</b>	Mono-adhesive tape
<b>Adhesive type:</b>	Polyacrylate dispersion dots
<b>Backing type:</b>	Polyvinyl chloride (PVC)
<b>Adhesive strength after 24h:</b>	> 1.5 N/25mm (AFERA 4001)
<b>Elongation at tear:</b>	> 150% (DIN EN ISO 527-3 50mm/min)
<b>Tear resistance:</b>	> 30 N/mm (DIN EN ISO 527-3 50mm/min)
<b>pH-value:</b>	7.0
<b>Ideal application temperature:</b>	from + 18° to + 25°C
<b>Resistance to temperature:</b>	from - 30° to + 50°C for long periods / + 70°C for short periods
<b>Shelf life:</b>	12 months

The above performance features are based on the results of tests and careful calculations. They are put forward in good faith but are not guaranteed. The end-user should check the suitability of the product for its intended use and consult us for any doubt about particular applications. Storage should be in dry, well ventilated rooms with a temperature around 20°C and protected from continuous exposure to direct sunlight. Always apply the product to clean and dry surfaces.
